

# VAPING ME CRAZY

@WARREN HILLS HIGH SCHOOL

**Presented by Steered Straight**  
**#1 booked assemblies in schools**

**We are in the worst mental health crisis America has ever seen! In a culture that grew up with pills marketed as the solution for every human ailment, the threat to our youth is greater than ever. Your awareness of the current drug trends can not be underestimated and is vital to your child's well being!**

**This presentation will uncover the national trend to minimize the dangers of marijuana, fentanyl, vaping, e-cigarette devices, alcohol, bullying, and suicide. Learn how these drugs are being marketed to our youth and be a catalyst to change.**

In 2022, about 1 in 10 or more than 2.5 million U.S. middle and high school students currently used e-cigarettes

14.1% (2.14 million) of high school students and 3.3% (380,000) of middle school students reported current e-cigarette use.

Approximately 3.7% (1.00 million) of all students reported currently smoking any combustible tobacco product .

The most commonly used device among current users was disposables (55.3%), followed by prefilled/refillable pods or cartridges (25.2%).

Parents will learn how vaping nicotine and other substances can affect the brain and body.

**This book contains more than 365, three minute conversations that we believe will deepen your parent/guardian-child connection. It will give children true perspective regarding drugs and alcohol, sex education, relationships/friendships, goal setting, defining who they are and who they want to become in life, and not to mention, treating others with respect and how to take a stand when they witness or encounter bullying. There are also 96 Family Field trips that you can plan with your family that will build lasting and meaningful relational bonding.**
